## UNIVERSITY OF CALIFORNIA, RIVERSIDE Glassy-winged Sharpshooter

# Newsletter

#### **ABOUT THE NEWSLETTER**

The purpose of the newsletter is to keep all those concerned with Glassy-winged sharpshooter (GWSS) and Pierce's Disease (PD) in the Temecula Valley up to date on GWSS activity in the area, based on monitoring being conducted by the University of California, Riverside. The monitoring program is supported by the California Department of Food & Agriculture and the Pierce's Disease Control Program. This newsletter provides updates twice a month over the most of the year of seasonal counts of GWSS from 160 traps in citrus groves and vineyards, counts relative to past years, and a list of the traps that caught GWSS. Only traps that caught GWSS will be listed, along with their unique trap identifier and total number of GWSS adults caught.

Approximate locations of each trap can be found here: <u>http://cisr.ucr.edu/temeculagwss/?p=544</u>

Updated maps of the trapping results can be found here: <a href="http://apps4.cdfa.ca.gov/piercesmaps/">http://apps4.cdfa.ca.gov/piercesmaps/</a>

## WEEKLY COMMENTS

There has been a slight decrease in GWSS activity since the last census period for a total of 64 GWSS across 22 traps. Please see map on page 4 for trap locations.
