

## **VMB-XL Dispenser** for Vine Mealybug (VMB)

## **DEPLOYMENT GUIDE**

Determine your row pattern based on vine and row spacing chart (see diagram on next page)

• Each bucket contains 1,000 dispensers which covers 4 acres

- Begin hanging dispensers on the first row of the hang pattern
- Hung them at the cordon wire or the base of the canes

• Ensure dispensers are on a sturdy branch or wire on the shady side

When the first row is complete, go to the second row of your hang pattern guide

• Use any extra dispensers to hang on borders or areas of high pest pressure

Hang patterns can be customized for your orchard.

Contact your Suterra representative to discuss a custom hang pattern to support your mating disruption program.

The use of Mating Disruption tools should be part of an overall Integrated Pest Management (IPM) program. The use of other pest control measures may be necessary and should be based on proper pest monitoring and field scouting.
